BULK BAGS

BLENDED LOAM TOPSOIL

A multi-purpose topsoil that is suitable for planting, general landscaping and more.

- Natural topsoil blended with peat-free soil conditioners
- Meets BS 3882:2015
- Independently tested for 70+ parameters
- Rich in organic matter and screened to minimise stone content

COMPOST

Fertile, peat-free and natural, our compost is ideal for all general planting or use as a soil improver.

- Responsibly produced to BSI PAS 100:2018
- Suitable for use as a mulch
- UK-sourced ingredients
- Promotes strong, healthy plant growth
- Assists with drainage and workability
- Not recommended as a seed compost

PLAY GRADE WOOD CHIPPINGS

Long-lasting, untreated wood chippings for a range of applications, including play areas.

- Certified to BS EN 1177:2018 Impact Attenuating Playground Surfacing – Determination of Critical Fall Height
- Ideal for play areas, beds, borders, paths and animal enclosure flooring
- Clean and untreated
- Responsibly sourced within the UK. FSC® certified.

BARK MULCH

UK-sourced, general-purpose bark mulch suitable for a range of landscaping schemes.

- Made from sustainably-sourced wood. FSC® certified.
- Suitable for general-purpose landscaping schemes
- Suppresses weeds and protects against frost
- White wood content no greater than 20%

FSC® is the mark of responsible forestry. Hallstone's bark and wood chip products are FSC-certified. www.fsc.org (Licence code: FSC-C147081)

Bulk bag sizes: approximately 0.5m³ (500L) when packed Coverage: 10m² at 50mm depth

HANDY BAGS

BLENDED LOAM TOPSOIL

MULTI-PURPOSE COMPOST

Suitable for all general planting schemes or for use as a soil improver, our Multi-Purpose Compost is rich in organic matter and peat-free.

- Suitable for all general planting
- Suitable for use as a mulch
- UK-sourced ingredients
- Promotes strong, healthy plant growth
- Assists with drainage and workability
- Not recommended for use as a seed compost

Bag size: 50L Coverage: 1.0m² at 50mm depth

Did you know...

In an independent study conducted by Rolawn®, almost 50% of third-party topsoil samples tested were found to be unsuitable for use in general purpose landscaping schemes and residential gardens.

Poor quality landscaping products affect more than just plant health. Your reputation is on the line at every job you do so subpar landscaping supplies are a risk that isn't worth taking. Manufacturers and suppliers may say the right thing but independent testing found 14 out of 30 topsoils did not meet the British Standard for Topsoil (BS3882:2015).

Independent testing found several concerns, including:

- Uncommonly high pH levels
- High levels of salt concentration
- High potassium levels
- Excessive sand content
- Elevated levels of a known carcinogenic chemical

Rolawn's two product samples were amongst the 16 topsoil samples deemed suitable for use as topsoil in general purpose landscaping schemes and residential gardens.

Tried and Trusted

From responsibly sourced ingredients to strict quality management processes, we built our business around supplying reliable, good quality products to trade and landscaping professionals.

All of our processes are subject to the same quality management systems as our sister company, Rolawn, which is certified to ISO 9001:2015 for Quality Management Systems and ISO 14001:2015 for Environmental Management Systems. These systems enable us to consistently deliver landscaping supplies that meet the needs of the industry.

It is important that gardeners and landscapers have confidence that the product they purchase is suitable for the use intended and that they can trust their supplier to deliver this.

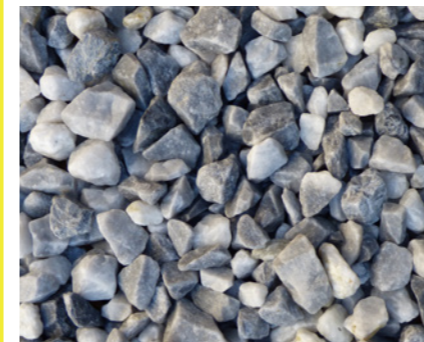

Tim O'Hare, professional soil scientist and Principle Consultant at Tim O'Hare Associates

Many consumers would no doubt be horrified to discover that the topsoil they have purchased in good faith, often based on the marketing claims of the producer or stockist, was in fact not suitable for use and indeed does not meet British Standards.

David Hurrion, independent gardening and horticulture expert

DECORATIVE AGGREGATES

At Hallstone, we supply a full range of decorative aggregates, from slates and chippings to pebbles and cobbles. Our decorative aggregates are suitable for a wide variety of applications and come in a range of styles to suit a variety of landscaping projects.

KILN DRIED SAND

Hallstone Kiln Dried Sand is ideal for use in between block paving to create a close and tight bond, making sure the block paving is stable. It can be easily brushed into joints of all types of block paving.

- Ready to use
- Easy to use and brush in
- Supports water drainage
- Creates a tight bond to help stabilise paving
- Non-staining
- Compliant with BS 7533-3:2005 Table D.4
- Can be used as a jointing sand or a grouting sand
- Colour may vary

Please note that decorative aggregates are a natural product and therefore subject to variations in appearance and size.

TURF

Hallstone Turf is a versatile, excellent value turf suitable for the majority of landscaping projects, from residential gardens to large-scale commercial projects. Grown in the UK, Hallstone Turf is hard wearing, drought and shade tolerant, and provides a healthy, green lawn once established.

- Excellent value for money
- Easy to handle and lay
- Easy to maintain throughout the year
- Fast-rooting - effective establishment in its new location
- Multi-purpose - can be used for any landscaping or garden project
- Ryegrass/fescue seed mix gives an excellent appearance and performance
- Sown, grown and harvested in the UK by our sister company, Rolawn®
- Produced at a competitive price through reduced use of fertilisers and herbicides
- Can be laid any time of the year, except onto frozen ground
- Retains its 'just-harvested' freshness for up to three times its normal shelf life due to our unique ProFresh® technology

TURF DIMENSIONS

Each turf roll measures approximately: 610mm wide x 1640mm long

Approximate depth: 12.5mm

Coverage: 1m²

PLEASE NOTE

Turf must be rolled out within 24 hours of delivery in autumn/winter and immediately in spring/summer.

Turf may contain fully biodegradable netting.

ABOUT HALLSTONE

At Hallstone, we pride ourselves on supplying landscaping and trade professionals with products that work as hard as they do.

We develop our products with a focus on performance, reliability and trade-friendly pricing so that you can buy with confidence. Whether you are looking for decorative aggregates to finish a planting scheme or turf for a private garden, Hallstone offers products to help you get the job done.

Our commitment to quality means that all of our processes are subject to strict quality management systems, ensuring consistent quality every time. Our topsoil is manufactured to BS 3882:2015 and undergoes independent testing to ensure there is no risk to health, and our ProFresh treatment extends the shelf life of turf.

Developed by Rolawn, ProFresh is a patented system that cools turf, extending the window of opportunity for merchants and stockists to sell fresh turf, reducing wastage and improving the bottom line.

Serving the trade since 2010 | **Available nationwide** | **99% customer satisfaction rate**
